Re: Application Acceptance
Geocel Corporation
53280 Marina Drive
Elkhart, Indiana
VRP #6070601

Dear Mr. Jeffers:

The Indiana Department of Environmental Management (IDEM) has reviewed your application for the Voluntary Remediation Program (VRP) and determined that your proposed cleanup is eligible for participation in this program. Your site identification number is 6070601. Please reference this number in all future correspondence.

Due to the nature of the release from the Geocel facility and the potential for exposure, IDEM expects that the Geocel Holdings Corporation will adhere strictly to all timelines required by the VRP. If at any time during the duration of this project IDEM determines that timelines are not being met, or the release presents an imminent and substantial threat to human health or the environment, IDEM reserves the right to take appropriate enforcement action against the Geocel Holdings Corporation.

The VRP will send you a Voluntary Remediation Agreement for this site soon. The agreement will include an estimate of IDEM's projected oversight cost for the project. If an investigation plan and /or investigation report has been completed for the site according to IDEM's outlines, it may be submitted after the VRA has been signed. Please note that each application will be treated by the Department as confidential until the Voluntary Remediation Agreement has been executed.

If you have any questions, please contact Corey Webb, who is the project manager assigned for this project, at (317) 234-0970 or at cwebb@idem.in.gov. Thank you for your participation in the Voluntary Remediation Program.

Sincerely,

Richard Harris, Section Chief
Voluntary Remediation Program
Office of Land Quality
